Our Story

Qetra is a Western Australian multi-disciplinary contractor, providing services to the resources, energy, and infrastructure industries. The company was founded in 2020 with a mission to bring an agile approach to construction projects.

Since inception, Qetra has grown to over 100 employees and is now a vertically integrated construction contractor, offering fabrication, assembly and construction services across structural, mechanical, piping, electrical and instrumentation works.

The Triquetra – a symmetrical triangular symbol of three interlaced arcs

An adaption of the word Triquetra

Each arc of the Triquetra represents one of the three company streams

Our Services

1

Fabrication

Our in house fabrication facilities are unique in providing a construction-first support model for all types of fabrication - structural, mechanical, piping and more. Flexible and dynamic, Qetra can complete fabrication projects of all sizes, on schedule and to a high standard.

2

Assembly

Qetra is well equipped to conduct offsite assembly works across structural, mechanical, piping, electrical and instrumentation packages. Not only useful for saving time on site, offsite assembly can identify design/construction issues earlier and improve the safety of site works.

3

Construction

Qetra can deliver small to medium sized construction projects in resources, energy and infrastructure industries. Leveraging off our greenfields and brownfields experience in project delivery across all disciplines, we have the agility to deliver turn-key solutions that meet client needs.

1 Fabrication

Structural Steel
Chutes, Hoppers & Launderers
Platework
Grating & Handrail
Pressure Piping
Carbon, Stainless & Exotics
Cast In Items
Precast Concrete
Urgent requirements

Hazer Hydrogen CDP

Gudai Darri ROM Containers

Mt Madden Conveyor Upgrade

Roy Hill Desalination Plant

2 Assembly

Trial Assembly
Structural Steel Assembly
Handrail and Grating Fit-out
Module Dressing
Mechanical Fit-out
Piping Fit-out
Electrical Fit-out
QA & Pre-Commissioning
Packaging for Transport

Kings Fuel Farm Pump Skid

MESA J TLO Chute & Supports

Lynas Rare Earths Gas Facility

Marvel Loch Conveyors

3 Construction

Workshops
Fuel & Lube Facilities
Washbays
Service Utilities
Process Plants
Compressor Stations
Delivery Stations
Power Stations
Greenfields & Brownfields
Hazardous Area Works

East Rockingham Waste to Energy

Walyering Processing Facility

Sunrise Dam Power Station

Mt Marion Lithium
